

## NAIL FUNGUS PEN

### FUNGE X NAIL FUNGUS PEN

Clinically proven treatment for fungal nail infections.

**What it is for:** FungeX Nail Fungus Pen is a medical device for the treatment and prevention of fungal nail infections (onychomycosis).

**Application:** FungeX Nail Fungus Pen is:

- Clinically proven effective against nail fungus
- Helps prevent spread and reduces risk of re-infection
- Improves nail appearance (brittle, ridged, thickened, rough or discoloured)
- Softens and nourishes nails
- Supports stronger, healthier-looking nails
- Quick-drying, invisible finish - discreet daily use

**About fungal nail infections:** Fungal nail infection (onychomycosis):

- Is one of the most common nail disorders
- Often starts as a white or yellow spot under the nail
- May cause thickening, brittleness, ridges, or discolouration
- Can spread to other nails and be passed to others in shared areas (e.g. swimming pools, gyms)

**How FungeX works:** FungeX combines antifungal action with nail care:

- **Protective layer:** creates an environment unfavourable for fungal growth
- **Barrier function:** prevents spread and re-infection
- **pH effect:** reduces nail acidity, slowing fungal development.
- With Biotin to support smoother, healthier-looking nails.

**Directions for use:** External use only. Application to children shall be performed by an adult.

1. Clean and dry the affected nail(s). No nail filing required.
2. Carefully twist the back of the pen until a drop of liquid is released.
3. Apply once daily using the precision brush. Cover the entire nail surface and underside if possible.
4. Re-cap the pen tightly after each use. Allow to dry for 1-2 minutes. Wash hands (except treated area) immediately after use.

Continue daily use until the infected nail has completely grown out. Can also be applied preventively on healthy nails. The pen remains clean and prevents spreading fungus between nails. May be used alongside oral antifungal treatments if prescribed.

**Tip:** Consistency is key. Stopping too early increases the risk of recurrence.

**If symptoms persist or worsen, consult a healthcare professional**

**Helpful prevention tips:**

- Keep feet dry, especially between the toes
- Wear cotton or wool socks and change them daily
- Avoid sharing nail clippers, shoes or towels
- Do not walk barefoot in communal areas

**Use during pregnancy & breastfeeding:** No safety data are available. If you are pregnant or breastfeeding, consult your doctor or pharmacist before use.

**Contraindications:** Do not use if allergic to any listed ingredient. Do not apply to open or damaged skin due to the risk of irritation or infection. Consult a doctor before use if you have diabetes, poor circulation, or a weakened immune system.

**Possible side effects:** Rare: redness, irritation, itching, swelling, pain, nail loosening, or allergic reactions (e.g. rash). If an allergic reaction occurs, discontinue use immediately and seek medical advice.

**⚠️ WARNINGS & PRECAUTIONS** For external use only. Avoid contact with eyes and mucous membranes. Do not apply to open wounds or broken skin. Do not bandage tightly or apply heat to the treated area. Do not expose treated nails to strong sunlight immediately after application.

**Storage:** Store in a dry at room temperature (5-25°C). Avoid inhalation of vapour. Keep out of reach of young children. Do not use after the expiry date shown on the packaging.

**Contains:** 1 FungeX Nail Fungus Pen with 4ml solution. One 4ml pen provides approximately 250 applications. Sufficient for several months of daily use on one affected nail

**Ingredients:** Ethyl Lactate, Glycerin, Aqua, Lactic Acid, Biotin
